You can find SICP (*Structure and Interpretation of Computer Programs*) online here:

<https://sarabander.github.io/sicp/>

Download Racket here:

<https://racket-lang.org/>

Use Racket online at Tio:

<https://tio.run/#racket>

1. Use `define` to define a symbol having a numerical value.
2. Use `define` to define a symbol having a string value.
3. Use `define` to define a symbol having a boolean value.
4. Use `define` and `lambda` to define a symbol having a function value.
